

Telemetry Cabinets

Main features:

Telemetry cabinet made of polyester, for installation in customers and producers in special regime substations.

Equipped and tested in accordance:

EDP – DMA-C17-510N - ABR 2004

Electrical specifications:

Type of current and frequency: AC – 50HZ

Operation voltage: 420 / 230 V

Maximum current: 400 A

Short circuit current: 25 kA

Insulation voltage: 690 V

Neutral system: TN or TT

Environmental temperature: -25° e +40°C

Altitude: Lower than 2000 m

Atmospheric pressure: 80 kPa

Weather conditions: Can be subject to weather with relative humidity of 100% (temporarily at the maximum temperature of + 25 ° C)

Pollution level: Degree 3 in accordance with section 6.1.2.3 of IEC 60439-1

Protection degree in accordance to NP EN60529 e EN 50102: IP44 – IK10
